Making space for business to grow

A CLOSER LOOK AT OUR MEZZANINE PROJECT PROCESS

1 We'll respond to your enquiry promptly.

2 There are lots of options when **choosing a mezzanine**

read our brochure

3 We draw up and spec your mezzanine to suit it's use to your load requirements.

4 Once our quote and plan are ready, we show you our proposal.

5 Your project is managed by a **Project Manager** (who is supported by our team back at Cubex HQ).

6 **We only use trusted contractors**

All our contractors are "bona fide" this means they are certified, qualified, insured and professional at all times.

7 A pre-contract meeting is arranged.

8 We process the order for your steel work and notify Building Control.

9 We instruct our surveyor to complete a comprehensive survey, taking note of existing services.

10 We check your premises asbestos register, or arrange to have a survey completed if required.

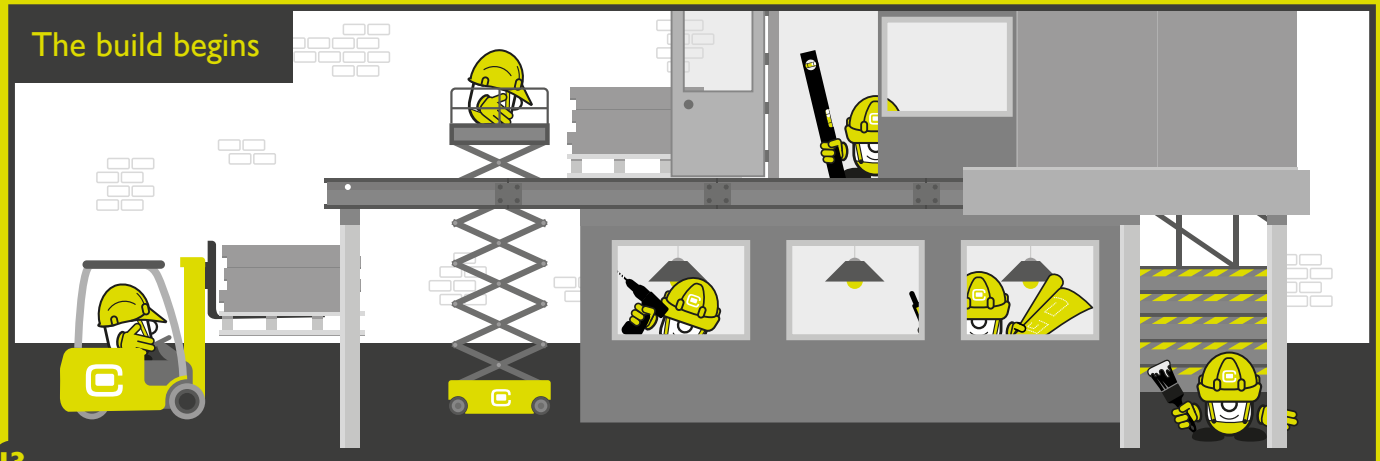

If we find asbestos it doesn't necessarily mean we can't go ahead with your project. Leave it to us.

11 **Technical drawings APPROVED!**

12 A **Project Programme** providing details of the timescales for your project as well as areas of disruption is sent to you.

	Week 1	Week 2	Week 3	Week 4
Stage 1				
Stage 2				
Stage 3				
Stage 4				
Stage 5				

A CLOSER LOOK AT OUR MEZZANINE PROJECT PROCESS

The build begins

13

We speak to **Building Control** and arrange for a building regulations inspection.

14

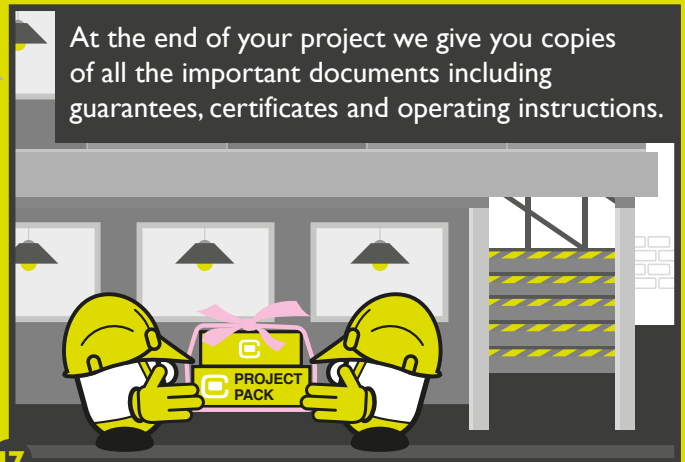

We take care of all the important details, keeping your project on track and within budget.

- Order steelwork for the mezzanine
- Request column schedule
- Order fire rated column casements
- Order fire rated ceiling
- Arrange electrics, lighting and smoke detection if necessary
- Arrange building regs inspection
- Practical completion meeting

15

16

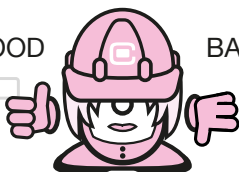

17

How did we do?

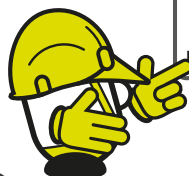

We carry out a satisfaction survey because your feedback is important to us.

GOOD BAD

18

We'll stay in touch after the project is completed.
