

Making better use of space on top and below of an existing mezzanine - Hitech GP

Who's the customer?

Hitech GP is the home of an established Formula 3 motor racing team, with over 30 years of racing experience. They are one of the top teams in the British Touring Car Championship and were the 2013 Dunlop British Touring Car Champions.

What was the brief?

Hitech GP premises at Silverstone, UK required some re-modelling to suit the needs of the growing business. They already had a mezzanine floor in situ which was open plan. The company needed to use the space, on

the mezzanine and beneath it, in a better way to allow them to incorporate the following:

- Machine workshop area
- Stores area
- Simulator room for the drivers
- Control room and viewing window (into the simulator room)
- Stairs

It was also really important to the customer that the design work and finish was on brand and complemented their corporate colour palette of black, red and grey.

This customer needed their mezzanine space to work harder

Cubex was recommended by one of our contractors, as Hitech GP had been unsuccessful in finding a company with the design flair and service we were able to offer.

What did we propose?

We carefully considered all the customer's needs and put together a plan to utilise the existing available space in the best way possible.

Starting with the design of partitioning in a non-standard black (aluminum partitioning powder coated in black) to create the stores area, machine workshops, simulator room, and viewing control room.

We also designed the partitioning to encase the staircase and create a storage corridor alongside the vehicle transporter area, so that the relevant kit for each car can easily be loaded prior to a race meeting.

Finishing touches included new furniture for the ground and first floor including:

- Managing Director's office
- Board room
- Reception
- Staff kitchen/dining area

About the project

The project was completed in May 2015 over a period of 3 weeks. The team of contractors comprised of partition fitters, carpenters, electricians and furniture installers.
